A Banyan Residence open house Ribbon Cutting by Lady Lake Chamber of Commerce. Pictured of the owners in from left Blake, Brandon Anderson and Greg Anderson on the right, the lady standing in the back ground in the red jacket was mayor Ruth Kussard. Many questions were being ask during the many tours so we thought we would do a question and answer story. SEE AD ON PAGE 2

1. Let me tell you about A Banyan Residence. What services are available at the facility?

a. A Banyan Residence is an assisted living and memory care resort that is owned and operated by the founding family. Our family started in assisted living and memory care in 1998 with a unique concept that emphasized an independent and outdoor lifestyle that we've built into our design here in The Villages area. By dedicating three full acres to botanical butterfly gardens, waterfall koi fish ponds, walking paths, gazebos, and the like, we find seniors are able to relax peacefully in a home-like and comfortable environment. We also offer a giant clubhouse full of amenities to keep residents active from sun up to sun down. We have amenities such as a movie theater, hair salon, physical fitness gym, ice cream parlor, bistro, crafts room, library, and a state-of-the-art sensory room showing off cutting edge technology geared for senior living.

Beyond the building design itself, we are staffed and trained to provide any necessary assistance to keep our residents independent for as long as possible while still making sure their daily needs are met. Our custom culinary program is designed to provide exquisite meals that would go unrivaled in the industry. Our enrichment program keeps seniors of all types stimulated, active, and

social with both on-campus daily events but also in the community, such as attending polo matches, live concerts, restaurant openings, and so on. Finally, our care program allows for seniors to rely on our staff to bridge the gap physically and mentally to achieve independence in their day-to-day lives while maintaining dignity and integrity.

What is unique to our design is that our entire facility is considered both assisted living and memory care, so all of the amenities and grounds can be enjoyed by all. This characteristic allows families to rest easy that no matter what happens physically or mentally due to aging, they know that their loved one will never have to move rooms because the same level of care can be provided anywhere on property.

2. How long has opening this facility in the area been in the works?

a. Our family began discussing building a community in The Villages nearly four years ago. Our founder, Greg Anderson, has a degree and background in construction prior to starting in senior living in the 90's. What is amazing is that over the past four years, Greg has been able to take a blank slate and combine his construction and design background with decades of assisted living experience to custom-design a community that structurally addresses issues seen in the industry. The entire process has been a collaboration among our family as partners and it's unbelievable to see the finished product. The attention to detail is extraordinary and some of the finer points can be overlooked if people don't take a tour with one of the owners.

3. Why open in The Villages area?

a. The culture in The Villages is something we have not ever experienced

Congresswoman Kat Cammack (FL-3) was interviewed at CPAC by The FAIRtax

Guys, Ron Maiellaro (left) and Bob Paxton (right).

before but immediately fell in love with once we began to immerse ourselves. The population is friendly, social, active, and full of life, which is exactly the culture what we've aimed to create in our communities for decades. Our family felt the need that the growing community had for senior living options and we thought our values and principles were well-aligned with the soul of the community. We think that our unique concept and design is needed in every community that serves the assisted living and memory care population, but the local culture made it very easy for us to call this area our new home.

4. How do you feel about now being officially open?

a. Finally being open is such an amazing feeling! This has been our largest, most complex, most difficult, and most rewarding project of our family's history. We used entirely local labor to help build the project and we can't thank them and the supporting community enough. We had plenty of sleepless nights and that doesn't even consider the global pandemic that was looming overhead threatening to alter the course of our destiny at any given moment. We're so grateful to have had a successful ribbon cutting and the blessing and support from local elected officials as well as our own congressman. We're hopeful that we can contribute back to the community to thank them for the support we've gotten to this point.

5. Jennifer told me that the facility is designed almost inside out so every room is open to the outside and residents have free range of the area. Why design the facility in that way?

a. Seniors have had unrestricted access to nature and the outdoors their entire lives... why should that change when they move into a senior living community? It seems too easy for a community to be

built with a labyrinth of fluorescent-lit hallways that have to be navigated before being able to get fresh air and our principles fundamentally disagreed with that idea. Many of these people owned homes where they could step out of their back door onto their patio to enjoy their own gardens. We took that same experience and projected it throughout our community, which is why we have butterfly gardens, fruit trees, fish ponds, waterfalls, etc. There is automatic value in being able to relax peacefully surrounded by nature and that lifestyle being just at your fingertips out your front door. It encourages enriched livelihood, independence, activity, and natural energy. The exposure to nature's light cycle also has very well-documented positive impacts on sleep schedules, moods, and behaviors. For someone that enjoys being outdoors in a lush tropical environment with sunlight and a breeze, we think we are the only community designed to capture that feeling.

AS I SEE IT

Apparently there is a growing movement across the USA to give voting citizens the power to 'veto'

some of the ridiculous actions of elected representatives from the president (regardless of party) on down to state and local government.

There isn't much space in a column like this, but suffice to refer to what little we know about the recent COVID 'Bail-Out-Bill'

What was in it?

Over 900 pages stuffed with earmarks, totally unrelated pork – money going to foreign countries and to obscure government agencies that we never heard of.

Unfortunately this is common practice, and the federal Government is the worst

offender.

Some activists call their plan the "Single Subject Rule" or "Single Issue Rule".

The idea is that no proposed law, including Presidential Executive Orders, could cover more than one subject.

For example, within the first two weeks his presidency, Joe Biden issued 42 executive orders,

During his presidency Trump abandoned 'Climate Change' -all with no 'input' from the voters.

Government has been unable to handle affirmative action, same-sex marriage, transgender in sports and other controversial problems.

Is it good for this country to constantly change the law every time there's an

election?

SLV is a 'Veto' for the people, by the people.

It would mean that government could only pass a law on a single topic, and the voters would have the power to defeat it.

Apparently, over 40 states have some kind of 'Single-Subject Rules' in their state constitutions some for over 100 years, but the Federal Congress has none.

This year, because of the ongoing COVID disaster, many good projects will go unfunded, but the pork will proceed as always.

A Single-Subject law could stop it.

There is also a so-called 'Separate-Vote Requirement' in some states, but it only limits Constitutional Amendments to one issue.

This 'One Topic Veto' (OTV) would give a lot more control to voters..

For example, who do you vote for if you are FOR 'Women's Reproductive Rights'-(Pro-Abortion?), and AGAINST, the ongoing, uncontrolled invasion of American borders. (Xenophobic?).

Liberal, Conservative, Republican, Democrat – There is no candidate for you!

But if OTV, was the law from 'Hicksville' to DC, you could vote for the best person available, with the reassurance that, if they break their campaign promises, you have a 'veto' in your pocket.

My guess is that our elected (mis) representatives might be a lot more considerate of their supporters preferences.

Right now the only recourse is 'Vote Them Out', but that's happened hundreds of times over the years, and the 'new guy' is always just as crooked as the old one.

Would OTV save citizens from corrupt legislators, or would it weaken honest politicians by empowering the ignorant masses?

Unfortunately, there are hundreds of cases, where the judges can't even decide

what, exactly qualifies as a 'subject'.

This is typical of the 'powers-that-be', arrogantly injecting themselves into issues which are none of their business.

As I see it, judges should limit their interference to the courtroom.

That is "Are all proceedings compliant with the law?"

But 'issues' are the realm of the voters.

Doesn't technology now allow all registered 'Citizen/Voters' to serve as one big Jury on any issue?

If you truly believe in "We The People", it might be time for you to demand the right to vote; when you want to vote and on any topic you choose!

Not just when 'they' allow you to.

Isn't this what 'democracy' was designed to do?"

Florida State Senate

DENNIS K. BAXLEY

Dear Friends,
This is the last column of the 2021 Legislative Session and by next month we will be ready to report on what all transpired during our time in Tallahassee. This session may be one of the most impactful years we've had in the Florida Senate. Even though we've filed less bills than previous years, the substance of the few that we have are some really big lifts.

Here's an update on some of those.
SB 90, a bill filed by your Senator, addresses a number of issues related to election administration and vote-by-mail. Simply put, we're looking to eliminate potentially weak areas of our voting process and ensure Florida's citizens that it will be easy to vote, but very hard to cheat. One provision in SB 90 addresses ballot harvesting so that no person may possess a ballot other than his or her own and those of

immediate family members. We are eliminating the use of drop boxes so that the ballot harvesting prohibition can be enforced and to prevent bad actors from having the opportunity to spoil ballots. The second largest provision in the bill expands the timeframe for canvassing vote-by-mail ballots, providing that one vote-by-mail ballot request is good for all elections through the next regularly scheduled general election. Current law states that one request is good for all elections through the next two general elections. This change is necessary to provide voters with more flexibility to decide which method of voting they want to utilize, instead of being locked in for two cycles.

Just this week the Florida Senate passed SB 72, which shields businesses and health care providers acting in good faith from lawsuits related to COVID-19. The threat of frivolous lawsuits shouldn't be hanging over these organizations who have sacrificed much and are trying to safely reopen. Your Senator was a proud co-sponsor of this very good legislation and we're excited that this was one of the first bills to pass this session.

The Committee on Government Oversight and Accountability just approved SB 1606, which designates November 7 as the Victims of Communism legal holiday in the State of Florida. While largely symbolic, this bill will serve as a reminder to our citizens that the voices of millions of victims throughout history cry out against the evils of communism and that we must be vigilant in putting down any attempt to normalize or accept this philosophy in our culture.

This is just a very small glimpse of some of the work that we are doing on your behalf in Tallahassee, and I look forward to providing a more detailed report upon our return to the district. If you have any questions about work we are doing on a particular subject, please call one of our offices and my staff will be happy to discuss in more detail.

Onward & Upward,
Senator Dennis Baxley

Teachers Learning Remotely

TGR EDU:

Realize your potential.
Help them reach theirs.

TGR FOUNDATION
Discovery EDUCATION

by Katherine Bihr, Ed.D

(NAPSI)—If you are among the nearly four million teachers in America, according to National Center for Education estimates, here are no-cost digital resources that can support your teaching during these challenging times.

Educating Educators Digitally

School personnel can now sign up for a new series of six no-cost digital professional learning courses empowering educators with new strategies to support students' success in school and beyond. The professional learning series for educators presents schools, particularly those from under-resourced communities, the access and materials needed to transform teaching during COVID-19 and beyond.

The first in the planned series of six professional learning modules supports teachers by focusing on student-centered approaches to foster innovative, relevant, and engaging STEM instruction. The module begins to redefine STEM by highlighting interdisciplinary learning, focusing on design principles and real-world connections, and rethinking skill building. Other modules focus on helping educators develop student-centered approaches, creating meaningful engagement strategies, promoting inquiry-based learning, and developing students' critical thinking skills.

Users can access lessons that are digestible and immediately actionable, with each module designed so educators can put

PUBLISHER'S NOTES

FREEDOM SHOT yes I heard a woman in a restaurant interview call her COVID-19 inoculation her Freedom Shot. Anthony Fauci got into a confrontation with Ran Paul over wearing a mask. I think Ran Paul said, "isn't it just theater?" If you get a

Freedom Shot and you can't spread the COVID-19 and you can't catch it why would you wear a mask? Ran Paul is suppose to be a very highly respected ophthalmologist. So he can discuss this as a Doctor as well as a Senator. Rand Paul said to Fauci you have been vaccinated and your still wearing a mask. That is sending a message to the people we will never get back to normalcy.

I read on the internet there were over 6,000 people died doing the pre 2022 World

Cup work. Workers were from Qatar, Sri Lanka, Bangladesh, Nepal, and India. Some say the workers were Exploited and in some cases forced to work! The temperature in Qatar goes well over 100. Investigations are going on, more info in the future.

Blowing out someone else candle does not make yours shine brighter! It does make you the only person with a light candle!

Close to home... Two local Dunnellon residents were arrested in connection with the Jan 6 riot at the Capital. As I understand they are part of a group called the Oath Keepers. They were not armed!!!

Recently went to a fund raiser. They were raising funds for a young boy who has been in Shane's fighting cancer for years. Local Ladies baked cakes, cookies, Banana Bread and such. I heard they raised \$14,000 dollars at the event.

My Business account got Hacked for several thousand dollars. Luckily we caught it early and I got my money back. But from what I understand it is harder to get your money back if they hack your Debit Card.

I still am having trouble wondering why McConnell gave that speech criticizing Trump his Ally or he use to be his Ally???. The World was watching and he accused Trump of being morally responsible for the Jan 6 riot. Trump did not tell those people to invade the White House.

Went fishing this month with my buddy Bill. It was mostly catch and release. I kept one fish for table. It was a nice Black Drum, what a fight. Very busy at the boat ramp trying to take the boat out, every time I would try to back the trailer in someone would rush in behind me. Finally one guy gave me a brake, I think I have seen him before. He is a nice guy, I think he had his Grandsons with him. My thanks to him!

Life is not about how many breaths you take but by the moments that take your breath away.

Wellness Travel Hits The Road

(NAPSI)—The classic American road trip is getting a makeover.

To meet the growing need for deeper, meaningful experiences that promote wellbeing, the automaker Lexus is putting travelers behind the wheel in its first-ever "Retreats in Motion" program.

These five-day, four-night driving retreats allow guests to take a scenic, restorative drive in a new 2021 Lexus IS between two of the brand's luxury hotel partners, with curated self-care activities along the way.

"These days, the desire to escape on the open road to rejuvenate mind and spirit has

CHIEF ROBERT TEMPESTA.

Distracted Driving is Dangerous

Anything that takes your attention away from driving can be a distraction. There is no doubt that the improvement of

technology in today's society has greatly benefited our society as a whole. But, sending a text message, talking on a cell phone or using a navigation system creates hazardous road conditions. These and any

other distractions, such as tending to kids or passengers in the back seat, eating, watching an event outside of the vehicle, interacting with passengers, unsecured pets, putting on makeup or grooming, adjusting radio or climate controls, checking your GPS app or daydreaming. These distractions can endanger you, your passengers, and others on the road.

There are three main types of distraction:

- Visual-taking your eyes off the road,
- Manual-taking your hands off the wheel
- Cognitive- taking your mind off driving.

Texting while driving has been proven

dangerous beyond dispute due to the fact that it requires all three distractions at once to complete. Taking one's eyes off the road for the average 5-6 second text, is enough to travel the length of a football field at 55 MPH.

According to the CDC related to 2018 statistics, over 2800 people were killed and an estimated 400,000 were injured in crashes involving distracted driving. About 1 in 5 of the people who died in crashes were not in vehicles. They were walking, riding their bicycles, or outside of their vehicle.

Young adult and teen drivers are the most at risk for distracted driving. In 2018, 25 percent of distracted drivers involved in fatal crashes were young adults aged 20-29. Drivers aged 15-19 were more likely to be distracted than drivers aged 20 and older among drivers in crashes where someone

died. It is important for parents to speak to their teen drivers about the risks of driving while distracted. Remind them that driving requires their full attention. This must also be done by setting the example for them. A parent/guardian who drives while distracted will likely not be taken seriously by their young driver.

Section 316.305, Florida Statutes allows law enforcement to stop motor vehicles and issue citations to motorists that are texting and driving. A person may not operate a motor vehicle while manually typing or entering multiple letters, numbers or symbols into a wireless communications device to text, email and instant message.

Section 316.306, Florida Statutes, is a prohibition on using wireless communications devices in a handheld manner in school and work zone. A person may not operate a motor vehicle while using a wireless communications device in a handheld manner in a designated school crossing, school zone or active work zone area. Active work zone, as it pertains to Section 316.306, Florida Statutes, means that construction personnel are present or are operating equipment on the road or immediately adjacent to the work zone area.

The men and women of the Lady Lake Police Department remind you to be safe out on the road and pay careful attention to the new road patterns due to the construction along US Hwy 441.

Reaching Carbon Neutrality \$1/Day

(NAPSI)—Zero net emissions of carbon dioxide from energy and industry can be achieved by 2050—and it could cost only about \$1 a day. That's the finding of a new study by James Williams at the University of San Francisco and Margaret S. Torn at the Lawrence Berkley National Laboratory. The study can be found in the peer-reviewed journal AGU Advances, which publishes high-impact, open-access research and commentary across the Earth and space sciences.

Why It Matters

According to the Intergovernmental Panel on Climate Change (IPCC), the world must reach zero net carbon dioxide emissions by mid-century to avoid the most dangerous effects of climate change.

How To Do It

- The researchers say it can be done by:
- Increasing energy efficiency.
- Switching to electric technologies.
- Using clean energy (especially wind and solar power).
- Deploying a small amount of carbon capture technology.

Why It Works

The cost of rebuilding the U.S. energy infrastructure to run primarily on renewable energy is lower now than even five years ago,

ONE PERSON'S OPINION

LETTERS TO THE EDITOR

Dear Editor:

Me First!

Biden had better put me first on the list before any illegal alien.

My roots go 4 generations of sweat equity in the bank, my children have 5 generations, and my grandchildren have 6, I deserve preferential treatment. Every penny for my children's college degrees was paid by my husband and myself. It was a major, major sacrifice. Now people who have sacrificed nothing are going to get what I earned. I do not think so.

We were an airline family, but went nowhere, because the money went for tuition.

Moving into a retirement community was an eye opener. Every one I met had traveled. I had nothing to contribute. No one thought the way that I did. Kids education came first.

Now, I cannot stand by, and allow Goofy Biden to kick sand in my face.

I want my tuition back. That includes one medical degree, and 3 pilots licensees. Education, is education, plus 2 additional degrees.

Biden you can expect my bill, post haste.

Fair is fair. I need to travel.

Any other real Americans being short shifted by Biden? Speak up.

Americans come first in the goodie bag line. We have equity.

Concerned Tax Payer!

Dear Editor:

When you are in a war, it helps to know what you know what the war is contesting.

When someone wages war against you, you need to know how to respond. This war

by the left is over REPRESSIVE TOLERANCE. A philosophy espoused by another Frankfort School {the school of mischief makers} participant Herbert Marcuse.

Redemption from repressive tolerance is through becoming Woke.

Woke is: anything the left imagines is an offense against anyone they can invent. It need not make any logical sense, or have any credence. Forcing other people to obey is the point, no matter the insanity of the proclamation. Just do as we say: loony tunes are the mantra of the day. Marcuse is infallible? God? Do as you are told, not what you believe. Your right to believe is rescinded. The Constitution has been shredded.

Will you refuse to be told what to do, what to think, what to say, how to act, or are you a competent human being capable of your own thought?

We just had a drastic example of the fallacy of the dipsey doodle logic. The recent cold winter points out the fallacy of the global warming theory. This planet has gone through climate change many times before we appeared, and survived those events. Global warming is a controlling excuse for the power hungry crowd. They will grasp at any excuse to take power. Global warming sounds like an excuse the gullible will swallow. It is working. Except during an ice storm. Time for a chuckle.

It would be helpful to look up repressive tolerance, then see where and how it is being applied. Is it helpful, or silly? Do you follow or resist? We the People are supposed to have the power. Or are we in a dipsey doodle dictatorship?

Freedom, freedom, freedom, demands that I push back. I know there are 2 genders, lazy people, stupid people, ruthless people, and I must beware of misguided people. My life matters to me, everyone else butt out. I have managed quite well for many decades, despite the challenges life has thrown at me. Everyone is visited by challenges. Some more than others, and that does not seem fair. This is the human condition that needs work. It must be done without interference from life's other condition ruthlessness. When we know what we are dealing with maybe good people can come to some kind of equitable solution.

Number one priority: Solve the ruthless problem. Then we tackle the challenges. No philosopher has ever suggested solving the ruthlessness problem. It is about time. 2500 years is enough of ruthlessness.

Do not just listen to me, go do the research for yourself. Power is the curse of humankind. Time to end the carnage.

D.I.L.

Carbon Neutrality

Continued from page 5

according to the study. The net costs range from 0.2% to 1.2% of GDP, depending on different trade offs, including how much land is given to solar and wind farms.

Transforming Infrastructure

"The decarbonization of the U.S. energy system is fundamentally an infrastructure transformation," explained Margaret Torn, a senior scientist at Lawrence Berkeley National Laboratory. "It means that by 2050 we need to build many

gigawatts of wind and solar power plants, new transmission lines, a fleet of electric cars and light trucks, millions of heat pumps to replace conventional furnaces and water heaters, and more energy-efficient buildings—while continuing to research and innovate new technologies."

In this transition, very little infrastructure would need "early retirement," or replacement before the end of its economic life. "No one is asking consumers to switch out their brand-new car for an electric vehicle," Torn added. "The point is that efficient, low-carbon technologies need to be used when it comes time to replace the current equipment."

Doing Well By Doing Good

There's even an economic upside to doing all this.

"All that infrastructure build equates to jobs in the U.S., as opposed to sending money overseas to buy oil from other countries," Torn said. "There's no question that there are a lot of jobs in building a low-carbon economy."

The cost figures should be lower still considering the economic and climate benefits of decarbonizing energy systems. For example, less reliance on oil will mean less money spent on oil and less economic

Homicide Arrest

DELAND MAN ARRESTED FOR HOMICIDE

Lake County sheriff's deputies responded to a reported stabbing Saturday evening at approximately 6:40 p.m. at a residence located at 44721 Lake Mack Drive in DeLand.

The suspect, 30-year-old Kolby Allen Parker, initially reported to deputies that he was attacked by his 77-year-old grandfather, Ronal Wells, Sr., who also resided at the residence with Parker. Parker initially claimed the two were smoking marijuana together and a confrontation began, at which time he said Wells came at him with a knife. Parker stated he was able to disarm Wells and use the knife against him.

The 77-year-old Wells was located deceased on the front porch of the home with apparent stab wounds.

While talking with responding deputies, Parker produced two human ears from his pants pocket, which were later discovered to be those of the decedent. He then became

violent towards the deputies, attacking and fighting them and trying to disarm them. He was secured and placed under arrest for Battery on a Law Enforcement Officer and Resisting with Violence.

Detectives arrived on scene to further the investigation, during which time they executed a search warrant for the property. Detectives located a baseball bat in the corner of the porch with what appeared to be blood-like stains, as well as a large butcher knife on the kitchen table and dripped blood on the kitchen floor.

Parker later confessed to striking his grandfather multiple times in the head with the baseball bat and then stabbing him with the butcher knife numerous times. He also admitted to cutting the victim's ears off and stated he wanted his grandfather to be with his deceased grandmother.

In addition to the charges of Battery on a Law Enforcement Officer and Resisting with Violence, Parker was charged with Second-Degree Murder (Domestic Violence) and was booked in with no bond.

Help For Family Caregivers

Free Professional Help For Family Caregivers

(NAPSI)—There is good news for many individuals who care for a loved one living with an injury or illness connected to military service. They're now eligible for free professional assistance.

Who Helps

A new program offered by the Elizabeth Dole Foundation provides veteran caregivers with trained professionals to perform daily tasks, including housekeeping, meal preparation, grocery shopping, and grooming.

Military caregivers nationwide can apply for 24 hours of services free through the Foundation's website hiddenheroes.org/respite. The number of available hours is limited, so caregivers are urged to apply right away.

"Military caregivers have always struggled with the enormous responsibility on their shoulders, but the risks and restrictions of COVID-19 have sent rates of caregiver burnout, depression and isolation soaring," said Steve Schwab, CEO of the Elizabeth Dole Foundation. "We developed this emergency assistance program to give America's hidden heroes the precious time they need to rest, relax and recharge."

The Foundation is managing the program in partnership with the U.S. Department of Veterans Affairs, CareLinx, Wounded Warrior Project, AARP, and Bob Woodruff Foundation. The professional caregivers are provided by the trusted and licensed professionals of the CareLinx network and follow CDC guidelines to ensure everyone's safety.

"I was skeptical that using respite care would actually help — I thought it might be more work than it was worth," said veteran caregiver Jennifer Mackinday. "But it was game-changing. It was the first step for me to start taking better care of myself mentally and physically."

Who Can Get Help

If you assist a service member or veteran with dressing, bathing, transportation, managing medication, physical therapy, or dealing with the symptoms of post-traumatic stress, you may be a military caregiver.

it into practice immediately. Lesson guides and supports let the series walk alongside the teacher and ensure fidelity of implementation.

The digital modules are designed as examples of how to bring the real world into the classroom. As teachers work to make learning relevant, it's important to hold up these models as exemplars of the importance of their work.

Great teachers are always looking for ways to ground themselves in frameworks that let them reflect and improve their practice. All of the modules in the TGR EDU: Explore initiative, created in partnership with Discovery Education, are grounded in the use of inquiry as a way to engage and have students own their learning. The digital learning modules have real people attached to each of the lessons, providing instruction and coaching in effective practice so that teachers can expand their expertise and meaningfully engage all learners.

Dr. Bihr is Vice President of Programs and Education at TGR Foundation, A Tiger Woods Charity, a nonprofit that empowers underserved students through education. To enhance classroom experiences around the world, TGR Foundation works closely with educators, taking their instructional skills to the next level with professional development learning modules, training videos and real-time digital workshops designed to improve

the classroom teaching and learning experience. TGR EDU: Explore is a joint initiative with Discovery Education to deliver award-winning curriculum, family resources, and professional development to educators, students, and families nationwide.

Wellness Travel

Continued from page 4

never been more enticing,” says Vinay Shahani, Lexus vice president of marketing. “The ‘Retreats in Motion’ program not only provides perfectly planned, luxurious getaways in a Lexus vehicle, but they also elevate the classic road trip with much-needed recuperative experiences.”

The Lexus partner hotels selected for the “Retreats in Motion” program have been hand-picked for their exceptional service, beautiful design and culinary offerings. Guests will spend two nights at each resort—with an average three-hour drive between each property—before returning to the originating hotel. Participating hotels in three California-based retreats include:

Cavallo Point Lodge to Post Ranch Inn
Bardessono Hotel & Spa to Pebble Beach Resorts

Terranea Resort to Post Ranch Inn

In spring 2021, those visiting the East Coast will be able to travel between XV Beacon and Chatham Bars Inn in Massachusetts.

Travelers will be paired with the new 2021 Lexus IS sport sedan at their originating hotel before embarking on a customized route featuring suggested stops

and wellness activities to enjoy throughout their drive. They'll feast their eyes on beautiful views, relax with aromatherapy or guided breathwork, and have the option to indulge their taste buds with healthy gourmet meals at the end of each day.

Unlike typical getaways, the “Retreats in Motion” program incorporates the vehicle as an integral part of the wellness experience. More than just transporting travelers from each partner hotel, the Lexus vehicle is a destination and sanctuary in and of itself and is equipped with a mobile wellness kit to help travelers get the most out of their journey.

In creating the program, the automaker has partnered with mindbodygreen, a health and well-being lifestyle media brand, to create custom content featuring some of the world's most-loved wellness experts for each retreat. Highlights include podcasts on sustainability with best-selling author Jonathan Safran Foer and a guided walking meditation with teacher Mary Beth LaRue, along with content covering topics from mindful eating to movement for longevity. Additionally, an immersive in-car sound bath with expert Sara Auster—designed to be played through the signature Mark Levinson sound system—helps clear energy blockages and deliver a sense of calm.

“mindbodygreen has enjoyed being a trusted destination and resource for well-being for over eleven years, bringing together experts across all facets of health and wellness for our collective audience,” says Colleen Wachob, mindbodygreen co-founder and co-CEO. “Our team is so

excited to work with an innovative, forward-thinking brand like Lexus on this partnership. Together, we're creating something really unique and so vital to people's well-being.”

Guests are responsible for the “Retreats in Motion” registration costs and travel expenses, which include:

- Five-day, four-night stay at each property;
- Loan of a new 2021 Lexus IS vehicle;
- Intimate access to curated wellness content, including self-care discussions, in-vehicle sound bath, meditation, guided breathwork and more;
- Complimentary welcome wellness kit.

Lexus and its hotel partners deeply value the health and well-being of their guests. Comprehensive health and sanitization procedures have been put in place for each Lexus vehicle and the hotels have implemented their own measures. Please refer to each partner hotel website for more details on their COVID protocols.

FROM THE DESK OF ATTORNEY GENERAL MOODY

Beware of Resurgence in Stimulus Payment Scams as Millions of Floridians Anticipate Direct Payments

TALLAHASSEE, Fla.—Attorney General Ashley Moody today issued a Consumer Alert warning Floridians of the possibility of a resurgence in stimulus payment scams as another round of direct payments from the federal government head to Florida. As part of a massive COVID-19 relief package, direct payments from the Internal Revenue Service are headed to the bank accounts and mailboxes of millions of Floridians—creating the potential for new stimulus payment scams. Anytime a government benefit or program rolls out, scammers will try to exploit the situation for their own benefit.

Attorney General Ashley Moody said, “With many Americans set to

receive direct payments from the federal government, we expect scammers will devise schemes to exploit the massive spending to trick recipients into parting with personal or financial information. Be smart. Seek out trusted sources of information about when your payment will be received and never respond to solicitations asking you to provide personal information or payment to receive a stimulus check.”

Floridians expecting stimulus payments should know:

- The IRS will never call a consumer directly, nor will the IRS send unsolicited emails, texts or social media messages;
- Recipients will not be required to make a purchase to receive a stimulus check;
- Offers advertising expedited delivery of the stimulus payment for a fee are suspicious and can be scams; and
- Solicitations asking receivers

to click a link or provide sensitive information are probably scams.

Some common signs of scams include:

- Unsolicited calls or emails;
- High-pressure tactics or too-good-to-be-true offers;
- Threats of loss if immediate action is not taken; and
- Requests for immediate payment by wire transfer, credit, prepaid debit or gift cards.

Last December, to highlight

potential stimulus payment and COVID-19 related scams and provide resources for Floridians to share with loved ones, Attorney General Moody's Scams at a Glance program released two new downloadable brochures detailing information about how to spot common COVID-19 and stimulus scams to stop fraud in its tracks. The brochures are printable and available in both English and Spanish.

Attorney General Moody launched the Scams at a Glance webpage in July 2020 to offer

Attorney General Moody Takes Action Against Google for Anticompetitive Practices

TALLAHASSEE, Fla.—Attorney General Ashley Moody is taking action against Google for multiple violations of federal and state antitrust and consumer protection laws—including anticompetitive conduct, exclusionary practices, and false and deceptive misrepresentations in connection with its role in the multitrillion-dollar online-display advertising industry. Google also made false and deceptive misrepresentations to consumers regarding Google's privacy practices. Google's monopolization of online-display advertising involves an anticompetitive agreement with Facebook, making misrepresentations to users and customers, and suppressing competition. Attorney General Moody is joined by a bipartisan multistate coalition of 14 other state

attorneys general in the lawsuit in the U.S. District Court for the Eastern District of Texas.

Attorney General Ashley Moody said, "For far too long, Google has used its size and position as one of the largest tech giants in the world to manipulate and unfairly monopolize the marketplace. The core of American economic success lies on our foundation of capitalism and a free, fair and competitive marketplace.

"Google knowingly and willingly monopolized the products and services used by advertisers in online-display advertising. The company also engaged in false and deceptive acts while buying and selling the online-display ads. Through their monopolization and deceptive acts, Google greatly decreased other publishers' ability to monetize their content while simultaneously increasing costs to advertisers. Most of all, Google harmed consumers, including the millions of Floridians who use the search engine daily."

The internet revolutionized the way people consume content and the type of ads that companies can purchase to reach consumers,

including online-display ads. In addition to representing both the buyers and sellers of online-display advertising, Google competes directly against the buyers and sellers they separately represent—all while operating the largest exchange on which these ad products are bought and sold. Google exchanges trades in billions of ad impressions a day.

This action alleges that Google monopolized or attempted to monopolize products and services used by advertisers and publishers in online-display advertising. The complaint also alleges that Google engaged in false, misleading and deceptive acts while selling, buying and auctioning online-display ads. These anticompetitive and deceptive practices demonstrably diminished publishers' ability to monetize content, increased advertisers' costs to advertise and harmed consumers.

Print Classifieds Still Work!

Email us today to place your ad: tloury@att.net

The advertisement features a festive Easter theme. At the top, the words "HAPPY" and "Easter" are written in a playful, bubbly font, with "Easter" in a larger, more ornate script. Below "Easter" is the word "SALE" in a smaller, bold font. The background is a vibrant blue sky with white clouds, a rainbow, and several colorful Easter eggs. In the center, there is a photograph of the Bob's Coins & Jewelry store building, which is a single-story structure with a large arched entrance and a sign that reads "BOB'S COINS & JEWELRY". Below the photograph, the text "Store Will Be CLOSED Mondays" is written in a large, bold, yellow font with a black outline. At the bottom of the advertisement, there is a dark blue banner with white text that reads "WE ARE ALWAYS BUYING" followed by a list of items: "U.S. & Foreign Paper Money • Coins, U.S. & Foreign Bullion Gold & Silver, & Platinum • Proof & Mint Coin Sets Sterling Silver • Pocket Watches • Jewelry • Swarovski & Lladro Figurine".
