## My Opinion "This is wrong"

Information from the net and sharing by TomL

The Biden Administration is sanctioning a safe house's for ILLEGAL's in the USA, probably many!

ILLEGAL SAFE HOUSE is in the former Homewood Suites in Scottsdale, Arizona.

The Hotel is on lock down and is guarded by LES Officers, LES is Law Enforcement Services hired for the job along with some ICE agent's. It has a cloak of mystery over and around it. No one is permitted to answer question but several good reporters got a few answers. It is interesting that they would pick a entire hotel and hire a food service to come in to feed them. Guess whom is paying for it. Some say it is a strategy to increase the population in curtain states and curtain voting districts to increase the amount of representative that are aloud. Shifting people and moving boundary's on voting blocks have been going on for years. In fact it has been done here locally.

The way this was found out was by a tip that was given to a reporter, the right reporter who followed up and printed the truth. I thought it worth sharing because of the seriousness of the matter. THE VOTING BLOCKS!

The former Hotel is part of a SanAntonio

nonprofit tied to President Biden administration. It's called Family Endeavor, they received millions of dollars for a no bid contract and received a second contract totaling the cost over \$600 million.

I wonder if they just took over the hotel? I am sure they are paying a lot of money for the nightly stays. The other question is who is paying? Either way it's us are the Taxpayer. They are using our Tax payer money. WE ARE PAYING THE BILL! I am mad as hell!

We have people killing each other over gang territory, meanwhile we are cutting the only agency that can keep the peice! We are letting lord knows who across our border without finding out who they are and or if they have a medical problem. All the enoculations to keep our school kids safe will suffer. These children and grownups that we are letting come across the border most don't have any inoculations. So we can have people suffering deceases from the past.

I have an idea we should tax or cut federal money to those countries that these people are fleeing from!!! What say you? (tloury@att.net)

## New Monoclonal Antibody Treatment State Site

**Governor Ron DeSantis Announces Opening of New Monoclonal Antibody Treatment State Site at The Villages**

**THE VILLAGES, Fla.** — Wednesday the 25th, Governor Ron DeSantis opened a new monoclonal antibody treatment site at The Villages. This treatment site will be

open seven days a week from 9 a.m. to 5 p.m. and has the capacity to serve more than 300 patients per day.

The Villages monoclonal antibody treatment site is located at:

**Barnstorm Theater  
2720 Brownwood Boulevard  
The Villages, Florida 32163**

**Hours: 7 days a week, 9 a.m. - 5 p.m.**

## Unauthorized Cameras Surveilling Street Traffic

Photos taken by George Marshal  
By TomL

Picture one is taken across from CVS on 441 Lady Lake. The unauthorized camera black pole on left still there but Camera gone.

Picture two is taken on CR 25 near Grand Oaks Resort. The camera pole is still there on the left in the background, camera gone.

These pictures seem to solve the question "were the unauthorized cameras in Lady Lake"? The answer is yes the pictures show proof of it. The next questions is who did the installation's, Flock Security did! who where they surveilling, for what reason were they surveilling, did the Lady Lake Town Council know about it? The answer is no the Lady Lake Town Council did not know about it!

There seems to be a lot of confusion about the camera's and how they got authorized to be installed. They were not authorized by the Lake County Commission. I first heard about these cameras by a resident in Lady Lake. They said they have seen them all over. I probe and looked around for more sources of information. I started asking questions. I ran into many dead ends. Most

residents did not know what they were for or who put them there.

I found out the reason I could not get any questions answered is because it started in Leesburg. None of the locals knew what was going on. I have been told Lake County Sheriff authorized the installation of these traffic camera's as a pilot program to help fight crime in the area. Makes policing sense but they needed permits and approval from Lake County Commissioners. The Lake County Commissioners did not know about the method of the Crime fighting program and was very unhappy. The camera's were ordered to be taken down. The poles that held them are still in place. Is there an effort to put them back.

The Lady Lake Town Council was not made aware of the project. As I see it's an infringement on residents privacy. The cameras have been taken down in Lady Lake but were up through most of August. I am sure Lady Lake Town Council will be reacting to this act of anti privacy.

PS On the Flock Security website the same security company is advertising "Now Hiring" in Ocala Florida.

## AS I SEE IT

This column is about 'government' not 'politics'.

Is this the BIRTH OF DICTATORSHIP in the Good Old USA?

Apparently any President, Governor or Mayor can issue an Executive Order which cancels, voids and over-rides the law. This goes all the way back to George Washington and every President since.

A recent example was the outgoing President, closing the border to Mexico, then the incoming President reversing that ban. And, after an invasion of over a million South Americans, he can change his mind again.

All this without any input or control by our elected representatives.

In fact, the Federal Register Act specifies that such orders need not be published if they had "no general applicability and legal effect.", but it doesn't say who makes that decision.

An executive order is supposed to limit the President to managing the Federal Government and should comply with laws passed by Congress and with the Constitution. But, of course, a President can fire any government employee who doesn't comply with his instructions, whether it's best for the country or not.

In theory, Congress could overturn an Executive Order. But any action they take would be vetoed by the President they are trying to control.

Then it would take a two-thirds vote of Congress to over-ride his veto – Not likely that either party would take on their own

President.

The U. S. Supreme Court could rule that an Executive Order is unconstitutional, but they seem to take a year or two to decide anything.

One Presidential Candidate said, of another, ""Executive orders sort of came about recently. Nobody ever heard of an executive order. Then all of a sudden he starts signing them like they're butter," That speaker then said "I want to do away with Executive Orders for the most part."

But eventually he signed about 55 per year and the person he was talking about signed only 35.

Regardless of which party, they're all politicians, so lying comes easy to them.

Florida is another example of a State Governor using his 'Executive Power' to bypass congress, and the voters.

For example, Florida lawmakers adjourned in March 2021 without finalizing a \$93.2 billion budget.

But the Governor used his 'emergency powers' and \$12 billion in federal COVID-19 assistance to trash their budget and make up his own version.

As mentioned, this is not a criticism of that Governors action. My question is "Does this practice, bypass, reduce, eliminate, avoid the concept of FREEDOM and DEMOCRACY valued so highly by all Americans?"

Why spend so much time and money on 'free' elections, when the decisions of our elected representatives can be canceled and ignored by a single 'dictator'?

It's a dangerous trend which threatens freedom in the USA.

AS I SEE IT, it's a mistake to say, "I support the person I voted for, no matter what."

Keep in mind that the other party will 'inherit' the dictatorship which you are creating.

'til next time . .

## Clean Your Clothes And The Planet

(NAPSI)—For many families, the cooling weather means a return to routines: work, school, sports practice, meal prep and household chores.

Busy parents have a lot on their plate getting families organized and in sync for the school year. Topping it off, this year demands extra precautions, which may mean more cleaning and more laundry. That can lead to switching to eco-laundry sheets that make it easy for the whole family to do laundry.

### New Habits Take New Thinking

Here are a four creative ways you can approach the task that will not only make it more fun for everyone but appeal to their mission of becoming better guardians of the environment:

**1.Make It Personal:** While you're shopping for school supplies, invite the kids

to choose a favorite laundry basket that they keep in their room. There are so many fun shapes, colors and styles that shopping for the one that suits your bedroom and personality can add an element of fun to the task.

**2.Make It Hassle-Free:** Subscribe for your laundry detergent online where everyone can participate in buying his or her favorite scent. There's no need to fret about storing all those bulky containers. You can now get laundry sheets that let you replace big plastic containers with space-saving, sleek envelopes that slip into a drawer or hide on a shelf. Along with saving space, you lower the environmental impact of transporting heavy jugs.

**3.Make It A Movement:** Being planet-conscious is important, so choosing eco-laundry detergent with no harmful chemicals can be considered a winner. The whole family may feel empowered knowing they're getting a detergent that's plastic-free, plant-based and has no harsh chemicals that could irritate sensitive skin or harm pets or other parts of the environment. What's more, the sheets are biodegradable in hot or cold water.

**4.Make It Easy:** When you reduce laundry down to one detergent strip for one load, doing the laundry becomes so simple, just about anyone can do it. There's no measuring and no mess. Plus, they're portable so travelers, college students and campers can simply slip a strip or so into their luggage.

The new eco-laundry detergent sheets, called USolve, boast no plastic packaging, no micro-plastics and no harsh chemical ingredients that pollute the earth.

Florida State Senate

## DENNIS K. BAXLEY

Dear Friends,  
Thank you for taking the time out of your day to read this country undertaker's column and for shouldering the responsibility of being an informed citizen that cares about what happens in this state and country.

Many different feelings strike me as we look around at what is happening in the world today, but the strongest feeling that

keeps rising to the top...is gratefulness. Grateful that we still live in a country where we have an incredible amount of freedom. A few weeks ago, the world watched the situation unfold in Afghanistan (thanks to Joe Biden's complete lack of competency) where we saw images of mothers throwing their children over barbed wire in hopes that some friendly troops might take them out of the country. We saw Afghan youths clinging to U.S. cargo planes as they took off, only to

come crashing back to the earth when they found they could hold on no longer. Such disturbing images remind us that freedom is that dear and most days we have no idea how fortunate and blessed we are to live in America. Let us keep the people of Afghanistan in our prayers that they may one day enjoy the freedoms that we do in this country and let our spirit of gratefulness glorify our heavenly father.

Our battle with COVID continues in Florida and the recent surge is very concerning. At this point, there isn't anyone that hasn't been touched in some way by this illness and we grieve with those that have lost loved ones. We are extremely optimistic that a big part of this fight can be won

through the use of the monoclonal antibody treatment and we encourage anyone who has tested positive to consider this option. In August, our Governor approved twenty different pop-up sites around the state that will administer this treatment, free of charge to Florida residents. As of this writing, there are at least six that are already open in Duval, Orange, Brevard, Broward, Pinellas, and Palm Beach counties. For more information, visit

<https://floridahealthcovid19.gov/treatment/>. This is a lifesaving treatment but you have to act early and before your symptoms become too severe.

For months now, we have focused on prevention and that is fine, but those issues have become very political. Some of them, for good reason. Mask mandates and vaccine passports have no business in a free society and our Governor has done a great job in balancing the issue of public safety and individual freedoms. There shouldn't be anything political about offering a treatment, yet Florida democrats are attacking Governor DeSantis for making this treatment available. Not because they don't think it works, but because they think the Governor should be mandating vaccines. Let people make their own medical decisions and let the Governor do his job. It's that simple.

We return to Tallahassee this month for our first week of committee meetings and in my next column, we should have a good report on what we see on the horizon for the 2022 Legislative Session. Thank you for letting me serve you in the Florida Senate.

Onward & Upward,

## PUBLISHER'S NOTES

### A GREAT GOVERNOR!

#### I Like Gov DeSantis!

Here we go.

A long comes Monoclonal Antibody

This Governor has not stop surprising me. He wants to come up with solutions and give credit

where credit was due. He noted that Trump bought all that the Monoclonal Antibody that the manufacturer had before he left office. It will be free to the public. That shows you how far ahead Trump is compared to Biden. He knew it would be important in the process of curing people with low Immune systems. The doctors treated Trump with Monoclonal Antibody's when he contracted COVID-19. The hospitals in Marion County are using it. Hope it comes to be available to the public in Marion County Soon.

### Shortage of GOOD, QUALIFIED HELP.

I recently went to one of our well known auto part stores. Ask for a replacement battery that fit my year and make of vehicle, the person waiting on me had to ask the his supervisor working in the store how to find it and he put it in. I noticed him struggling to get the right size wrench and how to take the battery out. Finally the battery was in but not bolted down. Not a big problem, it was starting to rain, I said just give the bracket that holds it in and I'll put it on later. The next day I lifted the hood and the battery that was in there was about 2 inches shorter and it had side and top post which can be handy. So this guy did not put in the same replacement battery that it called for because it was his first day on the job he was from a foreign country and had no skills. He had a job and I give him the D+ for effort but he was "UNQUALIFIED!" Consumer Beware.

\*\*\*\*

I'm Mad as Hell!

We need to tell the taliban that we are staying until every person we want out is brought to us at the airport. Every week past the deadline we will increase our presents by 10,000 top notch troops. If necessary we will fight them ourselves and all the puffed up ego's will be gone!

\*\*\*\*

United States affairs and world affairs are a terrible mess. The only thing I can think of is if Biden's son being investigated has compromised Biden and his office. Someone is telling him what to do! Who ever it is don't like Trump. Maybe Chucky, Nancy, Clinton, China, Russia, etc? You know the people have had their hand in our pockets!

What do you think?

tloury@att.net

A carnivorous plant, it trap insects in their erect, trumpet-shaped leaves. The leaves' slippery walls, covered in an array of downward-pointing hairs, prevent the insects from escaping. The insects fall to the bottom of the pitcher, into a deadly bath of rainwater and digestive enzymes.

## CHIEF ROBERT TEMPESTA.

### School's Open - Drive Carefully:

No matter where in Florida you may live, keeping our children and students safe is a community responsibility.

There are many guidelines put in place to ensure that our students arrive to and from school safely every single day such as designated crosswalks, School Crossing Guards or Community Service Aides, seat belt laws, and so on. But one law that is absolutely crucial and yet often gets ignored is, **"ALWAYS"** stopping behind a school bus.

Drivers need to remember that Florida law prohibits passing, in either direction, a school bus that is stopped with its "STOP" sign extended and flashing red lights activated on a two-way street or highway. If the highway is divided by a raised barrier or an unpaved median at least five feet wide you do not have to stop if you are moving in the opposite direction of the bus. Anyone caught passing a stopped school bus or speeding in a school zone can expect to get a costly fine – the Lady Lake Police Department simply will not tolerate violations that could harm a child. We also

take into account which side of the bus you chose when violating the law. While neither side is necessarily "safer," the amount of danger to kids sharply increases if you pass the bus on the right-hand side, as this is the side that the children use to step off of the bus, and therefore are more likely to be struck by your car.

- Drivers who pass a school bus on the right-hand side, will pay a minimum fine of **\$265.00**. A second offense within 5 years of this nature carries an additional **\$265 fine**, as well as the **suspension of your license for 180 days to one year**. There is a mandatory court hearing for both offenses.

- Drivers who pass a school bus on the left-hand side are no less culpable for their actions. You will pay a minimum fine of **\$165**. A second offense will add another \$165 to that total, along with license suspension of 90 days to 6 months.

You will also be required to attend and successfully complete a basic driver improvement course. Submission of successful completion proves to the state that you have reviewed and refreshed your knowledge of Florida traffic laws, including those dealing with school zones and school buses. Please reference Florida State Statute 316.172 and

<https://www.flhsmv.gov/safety-center/child-safety/school-bus-safety/> for further details.

Although any parent whose child takes the

bus to and from school has no doubt cautioned them about the dangers of traffic, we need to remember that children are still young and still learning. With all of the distractions and noises that are abundant on school busses, it's easy to imagine a child stepping off of the bus and not being able to hear oncoming traffic. We are the adults; it is our duty to abide by the laws put in place and give our children a safe environment in which to learn, play, and grow.

On behalf of the men and women of the Lady Lake Police Department, we wish everyone a productive and safe school year.

## The Story of Sharon Day

I would like to introduce myself. I am Sharon Day. For almost 30 years, I was in a fast paced career in a major New York Company. Although it was lucrative, it was not fulfilling. I got to a point where I needed to follow my inner guidance and make the leap into entrepreneurship. For the past 20+ years, I've been an energy therapist, an ordained Minister, Founder of Healing Hearts Animal Sanctuary (2005), and President of 4 Your Health LLC. I would like to share a story, which may have a profound effect upon your life.

On an ordinary day in November 2019, I received 3 calls from people who had recently attended funerals of victims of suicide. Each person questioned why this had to happen, with hints of blaming God. After the last call, saddened beyond words, I knelt and prayed, "God, give me a tool to help humanity."

Instantly, a vision filled the room. (A woman answers her door to find her son crying, having just come from school. He says, "Mommy, I can't take this anymore." The Mother leads her son to a dimly lit room and says, "Just relax and sit in the chair." The child reclined in a chair that appeared to have colored bubbles on the surface. He was left alone in the chair for 18 minutes, in which time, he went from distress to tranquility, from breathing erratically, to long deep breaths. His mind was calm and focused. His mother entered and said, "Are you feeling better?" "Mom, I'm ready to do my homework now." The two left the room.)

I didn't have an understanding of what just happened, so I asked to see the vision again. It was clear to me that something was going on. For the next 4 months, I studied the vision again and again. It took 2 years to turn this vision into reality. I have been

determined that this "tool for humanity" would be manufactured in the U.S.A.

I am excited to present to you the ONE-DER SYSTEM (See more on the back page of this magazine). May it have a profound effect upon YOUR life, as it has with my life.

God Bless

## Become A Healthier You

### Tips To Help You Stay Active And Become A Healthier You

(NAPSI)—Following a challenging year, it may be difficult to get back into a healthy routine. Summer is a great time to think

about what you can do to improve your health. Wherever you are on your journey to active and healthy living, there are things you can do to help you get or stay on track.

Try these tips to help manage your weight and stay active.

**Try to be active every day.** Make physical activity a part of your daily routine rather than something you do occasionally. Invite a friend or family member to make it more fun and to help you stick with your goals.

**Think small.** Small changes can add up to big results if you stay consistent. You don't have to run a marathon or go on a strict eating plan to lose weight. Taking just a 10-minute walk every day or replacing your bowl of ice cream with a piece of fruit are great choices that can improve your health over time.

**Look for creative ways to be healthier.** There are many ways to form healthy habits. Walk around a school track or a local park, take the stairs instead of the elevator, or try a hobby that keeps you moving, like gardening or dancing. Look for snacks low in added sugar and salt, like frozen or fresh fruit, hummus, and crunchy veggies.

**Reduce your "screen time."** We may not realize how much time we spend sitting still watching television, playing online games, or being on social media. Try turning off devices and take a walk, try a new sport with your loved ones, or create a playlist of favorite songs and have a dance contest.

**Be mindful of your eating habits.** Keeping a food and beverage diary will make you more aware of what you eat and drink, which can help you make healthier choices. Many apps and online tools are available to help you track your meals.

Health is a lifelong pursuit and is more achievable when you turn healthy behaviors into habits. To do that, remember to:

**Be patient.** Most people at some point in their lives try to become more active or lose weight. It's not easy, but it is doable! If you stick to your plan, you can reach your goals.

**Be prepared for setbacks.** It's normal to have slip-ups on your health journey. Don't feel bad or punish yourself. Instead, remember that creating new habits takes time.

**Celebrate successes.** Losing weight and becoming more physically active are big achievements. Be proud of yourself for wanting to become healthier and for doing what you can each day to make that happen.

If you are not sure where to start, visit the NIDDK's Body Weight Planner tool at

## A Safe Way to Return to Play

(NAPSI)—As life returns to normal following an impossibly difficult year, one aspect of the pandemic likely to remain is the understanding that clean, germ-free environments are important—especially when it comes to children.

It's well documented that playtime is vital to kids' social and emotional health; unstructured play helps them learn key developmental skills, such as patience, sharing, role play, risk taking and imagination. Other benefits of outdoor play

for kids include an increase of vitamin D and a boosted immune system, guaranteed exercise, and fostering an appreciation of the world around them.

After a year of being cooped up with very little opportunity to socialize or be active outdoors, a return to play is top of mind for many families and caregivers. But questions remain about how to do it safely.

Now parents can have more peace of mind when giving their children the outdoor play they crave, thanks to an antimicrobial coating specifically targeted for use on commercial playgrounds.

Available throughout the U.S., PlayArmor™ creates an invisible layer of protection on the surfaces children might touch. Cleaning with a disinfectant lasts only until the next person touches the equipment. PlayArmor bonds to the equipment's surface and will not come off with inclement weather or by touch.

Registered with the Environmental Protection Agency (EPA), the technology is proven to be safe and is also used in hospitals, medical research labs and restaurants. PlayArmor withstands pressure

washing and remains on playground surfaces to which it is applied, with no need to reapply for up to 90 days. PlayArmor is safe for humans, animals, and the environment.

### What to Look For

How will you know if your local playground and site amenities such as benches and tables are protected by PlayArmor? The equipment will have a visible PlayArmor label, which is a sign that the playground and site amenities are protected. PlayPower®, the world's largest commercial playground and recreational equipment manufacturer, introduced PlayArmor in partnership with Clearstream® Technologies, a specialized chemical company. For more information on PlayArmor, visit [www.PlayArmor.com](http://www.PlayArmor.com).

## They Saved A Baby's Life

### They Saved A Baby's Life—Here's How You Could, Too

(NAPSI)—If your family is like most, you've spent months preparing for the joys and challenges that arise with the arrival of a new baby—and if your family is like many, you've discovered not everything can be planned.

### One Family's Story

Consider the case of the McKennas: In July 2020, at six months pregnant with her

second child, Erica McKenna and her husband Dan, received devastating news about their unborn daughter. Their baby was experiencing a condition called maternal alloimmunization. This condition can occur when a pregnant woman's blood contains certain antibodies that attack the red blood cells of the fetus. This can cause the baby to become dangerously anemic.

Doctors told Erica if this condition was not treated, her baby would die. To stabilize and save her child's life, Erica's baby received five blood transfusions in utero starting at 24 weeks.

Just two months later, at eight months pregnant, Erica experienced worrying symptoms requiring immediate action. Within hours, she was in the hospital where she underwent an emergency C-section. Following delivery, her infant daughter was rushed to the NICU where another three blood transfusions were needed.

Nearly a year later, Erica and Dan's

## ONE PERSON'S OPINION

### LETTERS TO THE EDITOR

Dear Editor:

No one knows my health issues but me. Not even my doctor knows what issues I had 60 years ago. FAUCI DOES NOT KNOW. THE PRESIDENT DOES NOT KNOW. CUOMO DID NOT KNOW WHEN HE KILLED THOUSANDS OF ELDERLY VICTIMS

HOW CAN ANYONE MAKE LIFE AND DEATH DECISIONS FOR ANOTHER HUMAN?

AN AUTOPSY WAS DONE ON A COVID PATIENT AND THE SPIKES WERE FOUND IN EVERY ORGAN OF THEIR BODY.

THESE PEOPLE ARE PLAYING RUSSIAN ROULETTE WITH OTHER PEOPLES LIVES.

WHY ARE WE ALLOWING THIS. THEY ARE PUBLIC SERVANTS, WE TELL THEM. THIS GAME IS BEING PLAYED IN REVERSE, WE NEED TO FLIP IT,

MY BODY, MY LIFE, MY CALL. PERIOD.

THAT VACCINE IS A BUMMER.

I WAS TALKED INTO TAKING A FLU SHOT 60 YEARS AGO, AND ALMOST DIED. HAVE NOT HAD A SHOT SINCE. HAVE BEEN A GOOD STEWARD OF MY HEALTH SINCE. HAVE NOT HAD A COLD IN 60 YEARS. I AM CAPABLE OF MAKING A DECISION ABOUT MY HEALTH.

YOU ARE THE ONE PLAYING. RUSSIAN ROULETTE WITH YOUR HEALTH

IF YOU LIKE BEING BULLIED, BE MY GUEST. I DO NOT CARE. WHY SHOULD YOU CARE WHAT I DO. IT IS MY HEALTH, MY LIFE, NOT YOURS, BUTT OUT.

D.I.L.

\*\*\*\*\*

Deared editor:

I am throwing down the gauntlet. I challenge you to prove where communism is a success?

This is my case where it is not. North Korea, Cuba, Hong Kong, Venezuela, China.

Where people are not living a good happy fair life.

Stalin killed 30 million, and was treated like a celebrity, likewise Mao who killed 40 million. and Pol Pot his millions.

My observation makes my definition as follows: Communism is a Exterminating theory, and those that remain are enslaved politically, socially, economically, and morally.

So BLM is selling its constituency into a new form of slavery. Why is that preferably to freedom under a botched Capitalism. Capitalism can be fixed. We need level fair minded people working on the problem.

One glaring problem with Capitalism is no product involved. Selling data, that once was free. Selling and retaining control. The customers owns what they buy not the seller.

Control of products is the domain of the buyer not the seller.

Production cost and selling price must be reasonable. A hearing aid that costs at most \$200 to make cannot be sold for \$15,000, and be called fair. How can value be assigned to things that do not exist like hedge funds and derivatives[ pieces of paper or entries in a computer be considered a product]? WE need more oversight.

Another problem that needs attention: Public servants have gotten too big for their

britches, they need to be reeled in, Put back in their proper place. Speak up: Just say no to them, if they will not listen fire them, Most are not necessary in the first place.

Smaller government is better government, We the people need to assert our rights. Stop the tyranny. This is our country. Will we fight to keep it?

A bunch of ruthless power lusters are trying to steal it, it must be worth something,

Stand up and be heard, or submit to extermination, or slavery. A clear choice.

D.I.L.

## A Baby's Life

*Continued from page 6*

daughter, Annie, is a thriving baby with a smile for everyone.

"You would never know she went through all of that," said Erica. "We're extremely lucky. We're grateful for the people who donate blood and the amazing doctors who took care of us both."

### Arms Out For Annie

To give back, Erica and her family started Arms Out for Annie, a special blood donation campaign with a goal to recruit 100 donors to give blood in Annie's name before her first birthday on September 26.

"Annie's life was saved eight times," said Erica, referring to the eight transfusions her daughter received before and after birth. "She wouldn't be here without them. And I can't imagine our lives without her."

### What You Can Do

Currently, there is an emergency need for lifesaving blood donations. As the nation confronts a severe blood shortage, due to a rise in hospital demand for blood, the American Red Cross urges those who are healthy and able to donate now.

The Red Cross is distributing more blood products to hospitals across the country compared to the same time last year. Over

the past three months, the Red Cross sent 12% more blood products to hospitals each day for patients. Hospitals are responding to a higher number of traumas and emergency room visits and seeing patients who postponed medical care earlier in the COVID-19 pandemic.

All blood types are needed, particularly type O. With only about a day's supply of type O blood, there is an emergency need for type O donors. Type O is the most needed blood group by hospitals. In most cases, those who have received a COVID-19 vaccine can donate.

### How To Help

Healthy individuals are urged to schedule an appointment to give blood or platelets by using the Red Cross Blood Donor App, visiting [RedCrossBlood.org](https://www.redcrossblood.org) or calling 1-800-RED-CROSS.

## Light For Those Still In The Dark

(NAPSI)—Whatever happens with the new phase of the pandemic, and the glimmers of normalcy that bring joy and hope to many, the light at the end of the tunnel is difficult to see for many. This is particularly true of the loved ones of the nearly 4,000 U.S. healthcare workers who have died from COVID-related illness. Not

## Still In The Dark

Continued from page 7

only are these people coping with the death of their loved one, they may have lost the main breadwinner and be overwhelmed with the stress of paying for a funeral, paying their mortgage, or sending their children to college. But help may be at hand.

### Assistance Available

In May 2020, the Brave of Heart Fund was launched by the foundations of New York Life and Cigna, alongside charitable partner E4E Relief, to provide monetary grants that can help ease the financial and emotional burden of the families of front-line healthcare workers and volunteers nationwide who lost their lives to COVID-19.

### Reaching Eligible Families

The Fund's \$15,000 Phase 1 grants are available to certain spouses, domestic partners, parents, grandparents, children, and siblings of the deceased who are responsible for funeral expenses.

The Fund's Phase 2 grants of up to \$60,000 are available to certain family

members who were financially dependent on the healthcare worker's income for basic living expenses such as housing, utilities and childcare.

All grantees have access to emotional support and bereavement resources at no cost.

A recent Brave of Heart Fund grantee from Massachusetts reflected on the financial support provided, "The Brave of Heart Fund truly saved my life by providing me assistance after losing my husband. The financial grant I received helped me make payments on my car so I could continue getting to work. Through their assistance, I was also able to maintain payments so that I could stay in the home that my husband and I had lived in for years."

### How You Can Help

Anyone can help these families in need by sharing this information: The Fund will accept grant applications through December 31, 2021. Families of healthcare workers and volunteers nationwide—including doctors, nurses, technicians, orderlies, cafeteria workers, custodians, and others—who lost their lives working on the front lines of the healthcare industry during the COVID-19 pandemic may be eligible to apply.

### Learn More

For further information or to apply to the Fund, go to

[www.braveofheartfund.com](http://www.braveofheartfund.com).

## Alternative To Google Photos

### Picture This: A Free Alternative To Google Photos

(NAPSI)—If you're like most Americans, you have hundreds, perhaps thousands, of photos and videos stored on your phone, computer, tablet and so on. They bring back memories of happy times, loved ones, important occasions and beautiful places and you'd hate to lose them just because your computer dies or your phone gets lost. That's where cloud storage comes in. All cloud storage solutions on the market provide a basic set of services. That includes a specific amount of storage space, easy access to files and the ability to share files with other users.

### The Problem

One of the main differentiators among these products is the amount of free storage space they provide.

Google Photos, for instance, had long been loved for its unlimited free storage. Now, however, any photos you upload will eat into the 15GB of space on your Google account shared with your Gmail and Google Drive. And once that space is used up, you'll need to pay \$29.99 a year if you want to

upgrade to 200GB.

### Some Solutions

Fortunately for consumers, a variety of new cloud storage products have entered the market. Microsoft's OneDrive and Dropbox are familiar names and now there's a promising new product that might be the best free cloud storage provider you've never heard of.

Called TeraBox, it provides users with 1TB (1024GB) of free storage space permanently, with no catch. It's also fully compatible with Android, iOS, and desktop computers. And it can sync your files seamlessly across your devices.

1TB of free space is equivalent to carrying around a high-capacity hard drive on you at all times. That amount of space can store hundreds of thousands of photos, or thousands of high-quality videos.

### Cost Comparisons

Dropbox offers only 2GB of free space. To upgrade to 1TB, you'll need to pay \$9.99 per month. OneDrive fares only a bit better, offering 5GB of space free. A subscription fee of \$1.99 per month will buy you a mere 100GB of extra space. TeraBox may well be the only cloud storage solution to offer 1TB of space, free.

If you find that 1TB of free space isn't enough, you can upgrade to 2TB for \$2.99 per month. Google Drive also offers a 2TB subscription package, but at \$9.99 per month, roughly triple the rate.

### Size Matters

Another important consideration of cloud storage solutions is file size limitations. Users of TeraBox's free service can upload files as large as 4GB, while subscribers can upload files up to 20GB. TeraBox's sharing function has no limit on file size, so no matter how big a file, it can easily be shared with other users.

### Learn More

For further facts or to acquire the app, go to [www.terabox.com](http://www.terabox.com) or look for TeraBox in the Android app store.

## Finally, a Scientifically Documented Product for Women's Incontinence – That Works!!

**FEMAXEEN®** is a natural product designed to help women maintain a good bladder function and urinary flow.

**FEMAXEEN®** is a European product that underwent **Randomized Double Blind Clinical Studies\*** and obtained great results for the treatment of Urinary Incontinence in Women starting in as little as 90 days.

Stress Incontinence occurs when weakened pelvic floor muscles cause you to leak urine when you cough, sneeze, jump, or laugh. Intensive physical exercise or sudden movements can also set it off. This is caused when the Muscarinic Nerve Receptors (M3) which mediates the contractile response in the bladder stops sending said signals.

Urge incontinence typically occurs in older women and is when you feel a sudden, uncontrollable urge to urinate. It is caused by the Soft Detrusor Muscle in the bladder contracting during the Fill – Void stage in the bladder forcing urine to leak through the Sphincter Muscles. It can strike at any time or anywhere.

**FEMAXEEN®** has dual action that helps women conquer Stress and Urge Incontinence. Its proprietary ingredient **Uri-Cy-Tonin®** sends weak signals to the Muscarinic Nerve Receptors (M3) in the Bladder and this action helps you overcome Stress Incontinence while its Flower Pollen Extract works on the Soft Detrusor Muscle relaxing it, helping you fight Urge Incontinence or Overactive Bladder.

**FEMAXEEN®** dual action works by sending weak signals to the Bladder Receptors and the Soft Detrusor Muscle. These signals are weak, but they are cumulative, and their effect gets stronger month by month when taken daily.

In addition, **FEMAXEEN®** also has Vitamin D (Antioxidant) and Pumpkin Seed Extract to help you maintain good Bladder health.

- **FEMAXEEN®** works on both types of Incontinence, **Stress Incontinence & Urge Incontinence.**
- **FEMAXEEN®** s **UriCyTonin®** sends weak signals to the Muscarinic3 (M3) receptors, enabling them to inhibit the contractions necessary to control **Stress Incontinence.**
- **FEMAXEEN®**'s Flower Pollen Extract sends weak signals to the Soft Detrusor Muscle in the bladder helping stop the sudden contractions of this muscle that cause **Urge Incontinence.**
- **FEMAXEEN®**'s Pumpkin Seed Extract helps support Lower Urinary Track Health.
- **FEMAXEEN®**'s Vitamin E is a potent Antioxidant that can help protect the bladder.
- **FEMAXEEN®** is manufactured in Europe under strict GMP standards and in Europe unlike the U.S. natural products go thru health authority regulations.

### What our customers are saying :

**Maureen , Pennsylvania**

"Using **Femaxeen** has helped tremendous. It works as well as prescription medication. I can hold my urine longer without leaking, I did not have any side effects. I would recommend this product.

**Paola, Florida**

"Amazing natural product!!! I suffered with bladder incontinence for years after having my first child and couldn't find anything that would help, I tried prescriptions, but always hated the side effects. A friend recommended this, and it has so far worked miracles for me. Fast shipping, great product. A must try!!

**FEMAXEEN®** has been formulated to help you stop having to rush to the bathroom frequently, while helping to maintain a healthy bladder. In a 90-day clinical study among incontinence sufferers, after taking a daily **FEMAXEEN®** tablet, there were significant improvements in the participants' ability to maintain normal urine flow.\* ✦

## FROM THE DESK OF GOVERNOR DESANTIS

### Governor Ron DeSantis Announces New Monoclonal Antibody Site in Orlando

On August 16, 2021, in News Releases, by Staff

ORLANDO, Fla. –

Today, Governor Ron DeSantis announced that the State of Florida is setting up a new monoclonal antibody therapy treatment site in Orlando at Camping World Stadium. This location has the capacity to serve more than 300 patients per day and will be open from 9 a.m. to 7 p.m. daily.

“Early monoclonal antibody treatment keeps people out of the hospital and saves lives,” said Governor Ron DeSantis. “We look forward to continuing to open these sites throughout the state and hope awareness about the treatment continues to spread.”

To find locations to receive monoclonal antibody treatments around the entire state, please visit [floridahealthcovid19.gov](https://floridahealthcovid19.gov).

“The monoclonal antibody treatment can be a game changer if you get it early,” said Secretary of the Agency for Health Care Administration Simone Marstiller. “I have seen firsthand how effective this therapy can be at keeping people out of the hospital and speeding their recovery. Once again, Governor DeSantis has prioritized Florida’s seniors and has created a delivery

system for the monoclonal antibody treatment that will allow Florida’s most vulnerable citizens to receive the treatment without leaving their long-term care facility and keeping them at home and out of hospitals.”

“The Division is committed to increasing access to monoclonal antibody therapy statewide, in coordination with the Florida Department of Health,” said Florida Division of Emergency Management (FDEM) Director Kevin Guthrie. “We will continue to work with County Emergency Management offices to identify additional locations for this lifesaving treatment and ensure that Floridians have access to all potential treatments that can help them recover from COVID-19.”

“This is a lifesaving treatment that needs more attention,” said FDEM Chief Medical Officer Dr. Kenneth Scheppke. “Thank you to Governor DeSantis for his dedication to protecting Floridians through innovative solutions. By increasing access to monoclonal antibody therapy through mobile and stationary sites, we will continue the fight against COVID-19 in Florida and bring this treatment to the individuals who need it most. Monoclonal antibodies have been used in medicine for decades and have the ability to protect the human body from viruses.”

Monoclonal antibody treatments can be prescribed by health care providers to individuals 12 years of age and older who

have been diagnosed with COVID-19 or who have been exposed to someone with COVID-19 and are at high risk for severe illness and hospitalization. However, to support Governor DeSantis’ initiative, there is currently a standing order in Florida signed by the State Surgeon General that allows patients to receive this treatment without a prescription or referral if administered by an eligible health care provider. Such referrals are not required at any of the State of Florida monoclonal antibody treatment sites and treatments are available at no cost to patients.

The antibodies help the immune system recognize and respond effectively to the virus. According to [the treatment guidelines](#), they should be administered as soon as possible after diagnosis. By providing access to these treatments at these new sites, Governor DeSantis is alleviating demand on hospital resources and further making sure that Floridians have access to all potential treatments that can help them recover from COVID-19.

Governor DeSantis and the Florida Department of Health continue to encourage Floridians to receive the COVID-19 vaccine.

### Governor DeSantis Responds to the Associated Press Regarding the Publication’s Failure to Retract Brazen Political Attack

On August 23, 2021, in News Releases, by Staff

TALLAHASSEE, Fla. – Today, Governor Ron DeSantis responded to a

letter from the Associated Press, in which the publication defended its failure to retract a debunked political attack, and ultimately discouraged readers from seeking life-saving treatment. The article, titled “DeSantis top donor invests in COVID drug governor promotes,” was framed in political insinuations that will no doubt lead some to decline seeking life-saving treatment.

After the Governor’s staff dispelled the misleading narrative and exposed the partisan agenda of the Associated Press, the publication sent a letter to Governor DeSantis on August 20, criticizing him for his staff’s efforts to correct the record.

Today, Governor DeSantis responded to that letter, not only defending his staff, but once again calling on the Associated Press and corporate outlets to stop creating conspiracy theories, publishing clickbait headlines and circulating partisan political narratives, at the expense of readers.

Clinical trials of monoclonal antibody treatments result in a 70% reduction in hospitalization and death.

## A New Look At A Past Pleasure

(NAPSI)—Here's news for TV fans: For eight years in the 1960s, one TV program, "The Andy Griffith Show," was consistently ranked in the top ten most popular. If you're a fan—or would like to see its appeal for yourself—you may be glad to know there's now a podcast that can explain it all to you.

Set in the idyllic North Carolina town of Mayberry, the half-hour comedy shows the life and times of Andy Taylor (Andy Griffith), a widower sheriff, his young son Opie (Ron Howard) and his Aunt Bee (Francis Bavier), who takes care of the family. Andy is assisted by his bumbling deputy, Barney Fife (Don Knotts), and the town is full of charming characters played by some outstanding actors.

The show is still available on some cable and streaming channels, and now there's a podcast that looks into each episode in depth with humor, knowledge and affection for the series.

Writer Aaron Tallent and Chris Cordingley host "The Loaded Goat," a re-watch podcast every Monday and Thursday.

The two break down the series episode by episode. Each podcast provides interesting tidbits about the show and takes that are both in-depth and fun for old and new generations of fans.

You can check out the podcast on Apple, Spotify, Amazon and wherever podcasts are available, as well as

[www.loadedgoat.net](http://www.loadedgoat.net).

## Whatever Happened To...

### Whatever Happened To Prince John?

(NAPSI)—You may think it's a legend out of ancient times, but in little more than living memory there was a royal prince—who vanished (at least as far as the press and public were concerned).

#### The Story of the Missing Prince

Even an ardent Anglophile and

enthusiastic follower of the British Royal Family might be surprised to hear a story about the little-known prince and the hushed rumors and speculation that surrounded his death for many years.

The fifth son and youngest of six, Prince John (Queen Elizabeth's uncle) was born in 1905. His parents were King George V and Queen Mary. At the time of his birth, his father was heir apparent to the reigning monarch, King Edward VII. In 1910, the Prince of Wales succeeded to the throne and Prince John became fifth in the line of succession to the British throne.

But a childhood illness would play a hand in the fate of the young prince and his story would become something of a well-hidden family secret.

At the tender age of four, Prince John was discovered to have epilepsy, and as his condition worsened, he was sent to live out of the public eye at Sandringham House to be cared for by his governess. His mother gathered local children to befriend the prince, but he was otherwise hidden from the public from early childhood. The young prince died of a severe seizure in 1919 at Sandringham and was buried at nearby St. Mary Magdalene Church. His illness was only disclosed after his death.

### Did The Royals Try To Hide An "Upsetting" Secret...

Royal historians who have since delved into the sad story of Prince John have speculated that the Royal Family tried to hide the Prince away, and this was a great display of inhumanity.

His governess wrote that the family didn't want to let John be with his brothers and

sisters because his frequent attacks "upset them so much." Prince Edward, who was 11 years older than his brother and had barely known Prince John, callously stated in a letter to his mother that he saw this death as "little more than a regrettable nuisance." He later apologized to her for being "cold hearted and unsympathetic."

### ...Or Were They Just Protecting The Family?

Some accounts, however, are very much to the contrary. They state he was a full-fledged member of the family, making frequent public appearances until after his 11th birthday, when his condition became untenable.

#### You Decide

Now, you can determine the truth about this royal conundrum for yourself based on a two-part drama series about Prince John: "The Lost Prince." It shows the vastly different way illnesses such as epilepsy were treated and acknowledged a century or so ago as compared to today.

#### How To See The Story

The series is available on True Royalty TV as of September 14, through Amazon Channels, The Roku Channel, Xfinity TV, Sling TV, Contour and via [www.trueroyalty.tv](http://www.trueroyalty.tv).

## ATTORNEY GENERAL MOODY

### Attorney General Moody Activates Price Gouging Hotline in Preparation for Tropical Depression Fred

TALLAHASSEE, Fla.—Attorney General Ashley Moody today

activated Florida's Price Gouging Hotline as Tropical Depression Fred approaches the state. The activation follows Governor Ron DeSantis's [state of emergency declaration](#) covering Bay, Calhoun, Citrus, Dixie, Escambia, Franklin, Gadsden, Gilchrist, Gulf, Holmes, Jackson, Jefferson, Lafayette, Leon, Levy, Liberty, Manatee, Okaloosa, Santa Rosa, Taylor, Wakulla, Walton and Washington counties.

Floridians can now report instances of extreme price increases on essential commodities needed to prepare for the storm. Florida's price gouging law only applies to commodities and services essential to preparing for, or recovering from, a storm within the areas of a declared state of emergency.

Attorney General Ashley Moody said, "With Tropical Depression Fred approaching our shores, I'm urging all Floridians to be prepared. I've activated the state's price gouging hotline to accept reports of extreme price increases of essential goods in areas covered by the declared state of emergency. Help us

protect consumers—if you suspect price gouging, report it to my office using the free No Scam reporting app, or calling 1(866) 9NO-SCAM."

During a storm-related declared state of emergency, state law prohibits excessive increases in the price of essential commodities, such as food, water, hotel rooms, ice, gasoline, lumber and equipment, needed as a direct result of the event.

Anyone who suspects price gouging can report it to the Florida Attorney General's Office by using the No Scam app, visiting [MyFloridaLegal.com](#) or calling 1(866) 9NO-SCAM. The Attorney General's No Scam app can be downloaded for free on Apple and Android devices through the app store by searching No Scam.

For tips on reporting price gouging, go to [MyFloridaLegal.com](#)

For more information on price gouging, go to [MyFloridaLegal.com](#).

To download Attorney General Moody's *Scams at a Glance: Price Gouging* brochure in English, go to [MyFloridaLegal.com](#). To download *Scams at a Glance: Price Gouging* in Spanish go to [MyFloridaLegal.com](#)

Violators of the price gouging statute are subject to civil penalties of \$1,000 per violation and up to a total of \$25,000 for multiple violations committed in a single 24-hour period. In addition to the civil penalties for price gouging, state law criminalizes the sale of goods and services

to the public without possession of a business tax receipt.

For tips on what to do before and after a storm strikes, download the 2021 Hurricane Preparedness Guide at

### Three Arrested for Abuse and Neglect Resulting in Third-Degree Burns

TALLAHASSEE, Fla.—Attorney General Ashley Moody's Medicaid Fraud Control Unit, with the assistance of the Orange County Sheriff's Office and Groveland Police Department, today announced the arrests of three Metro Orlando registered nurses for aggravated abuse and neglect of a disabled adult. Christina Hison, Linda Moore and Christopher Rodriguez Lozada are accused of causing third-degree burns to a disabled adult.

Attorney General Ashley Moody said, "This trio was trusted to provide care to a patient suffering from a serious health condition. Instead of acting in the best interest of the patient, they disobeyed hospital policy and established medical procedure. Because of their actions, the patient suffered a new set of medical issues requiring multiple surgeries. Thanks to the work of my Medicaid Fraud Control Unit and local law enforcement, these caregivers will be held accountable for their neglect and abuse. We will not tolerate abuse of our seniors in Florida."

According to the investigation, Hison,

Moore and Rodriguez Lozada worked as registered nurses for Select Specialty Hospital Orlando North, a long-term care hospital in Orlando. In September 2019, the three provided care to a disabled adult suffering from hypothermia. Against hospital policy and established medical procedure, Hison, Moore and Rodriguez Lozada applied ice bags filled with hot water—allegedly from a coffee maker with a hot water dispenser—to the disabled adult's body in an attempt to counter the patient's hypothermia. The disabled adult was then left alone for at least two hours before another employee discovered that the victim sustained several third-degree burns. As a result, the patient required transportation to Orlando Regional Medical Center to undergo several skin-graft surgeries.

Hison, Moore, and Rodriguez Lozada each face one count of aggravated abuse of a disabled adult, a first-degree felony; and neglect of a disabled adult, a second-degree felony. If convicted, each face up to 45 years in prison and up to \$20,000 in fines. The Office of the State Attorney for the Ninth Circuit will prosecute the case.

###

The Florida Attorney General's Medicaid Fraud Control Unit investigates and prosecutes providers that intentionally defraud the state's Medicaid program through fraudulent billing practices. Medicaid fraud essentially steals from Florida's taxpayers. From January 2019 to the present, Attorney General Moody's MFCU has obtained more than \$74 million in settlements and judgments.
